ORDINANCE 01-04-2017

AN ORDINANCE AMENDING THE CITY SEWER IMPACT FEE FACILITIES PLAN AND SEWER IMPACT FEE ANALYSIS; ADOPTING SEWER IMPACT FEES; ADOPTING CERTAIN POLICIES RELATED TO IMPACT FEES; AND ESTABLISHING A SERVICE AREA FOR PURPOSES OF IMPACT FEES.

WHEREAS, Santaquin City (the "City") is a political subdivision of the State of Utah, authorized and organized under applicable provisions of Utah law; and

WHEREAS, the City has legal authority, pursuant to Title 11, Chapter 36a of the Utah Code Annotated, as amended ("Impact Fees Act" or "Act"), to impose development impact fees as a condition of development approval, which impact fees are used to defray capital infrastructure costs attributable to new development activity; and

WHEREAS, the City has previously enacted and imposed impact fees for public facilities, as defined in Utah Law, Title 11 Chapter 36a, Section 102, and as more particularly set forth in the Santaquin City Fee Schedule; and

WHEREAS, the City desires to amend its previously adopted Sewer Impact Fees in accordance with applicable provisions of the Impact Fees Act in order to appropriately assign capital infrastructure costs to development in an equitable and proportionate manner as more particularly provided herein; and

WHEREAS, the City properly noticed its intent to amend the Sewer Impact Fees Facilities Plan and the Sewer Impact Fee Analysis as required by law and the City has, through its consultants, completed the Sewer Impact Fee Facilities Plan and Impact Fee Analysis in accordance with applicable provisions of the Impact Fees Act, which Sewer Impact Fee Facilities Plan and Impact Fee Analysis are more particularly described and adopted herein; and

WHEREAS, the City has provided the required notice and held a public hearing before the City Council regarding the proposed Sewer Impact Fees, Sewer Impact Fee Facilities Plan and Sewer Impact Fee Analysis in accordance with applicable provisions of the Impact Fees Act; and

NOW, THEREFORE, BE IT ORDAINED BY THE CITY COUNCIL OF Santaquin CITY, STATE OF UTAH, AS FOLLOWS:

SECTION I. PURPOSE

This Sewer Impact Fees Ordinance establishes the City's Sewer Impact Fees policies and procedures and is promulgated pursuant to Title 11, Chapter 36a, Part 4, Enactment of Impact Fees, and other requirements of the Impact Fees Act. This Ordinance adopts Sewer Impact Fees for wastewater related facilities within the City Service Area as defined herein, provides a schedule of Sewer Impact Fees for development activity, and sets forth direction for challenging, modifying and appealing Sewer Impact Fees. This Ordinance does not replace, supersede, or modify any ordinance regarding impact fees unrelated to Sewer facilities and improvements. This Ordinance may be referred to and cited as the "Sewer Impact Fees Ordinance."

SECTION II. STATUTORY AUTHORITY AND RESTRICTIONS

- 1. Impact Fees Act Authority. The City is authorized to impose impact fees subject to and in accordance with applicable provisions of the Impact Fees Act. Impact fees may only be established for public facilities as defined in Section 11-36a-102 that have a life expectancy of 10 or more years and are owned or operated by or on behalf of a local political subdivision. Public facilities for which impact fees may be imposed includes public sewer facilities.
- 2. Impact Fees Act Restrictions. Pursuant to Section 11-36a-202 of the Impact Fees Act, the City may not impose an impact fee to: (1) cure deficiencies in public facilities serving existing development; (2) raise the established level of service of a public facility serving existing development; (3) recoup more than the local political subdivision's costs actually incurred for excess capacity in an existing system improvement; or (4) include an expense for overhead, unless the expense is calculated pursuant to a methodology that is consistent with generally accepted cost accounting practices and the methodological standards set forth by the federal Office of Management and Budget for federal grant reimbursement.

SECTION III. SERVICE AREA

The Impact Fees Act requires the City to establish one or more service areas within which the City will calculate and impose a particular impact fee. The service area within which the proposed Sewer Impact Fees will be imposed is described in Santaquin City Code (S.C.C.) §9-2-4.

SECTION IV. IMPACT FEE FACILITIES PLAN (IFFP)

- 1. Impact Fee Facilities Plan Required. Pursuant to Section 11-36a-301 of the Impact Fees Act, before imposing or amending an impact fee, the City is required to prepare an impact fee facilities plan to determine the public facilities required to serve development resulting from new development activity. The impact fee facilities plan shall identify the demands placed upon existing public facilities by new development activity and the proposed means by which the City will meet those demands.
- 2. Sewer Impact Fee Facilities Plan. The City has, through its consultants, researched and analyzed the factors set forth in Section 11-36a-302 of the Impact Fees Act and has caused to be prepared a Sewer Impact Fee Facilities Plan ("IFFP"), as more particularly set forth in Exhibit A, attached hereto and incorporated herein by this reference. The Sewer IFFP has been prepared based on reasonable growth assumptions for the City and general demand characteristics of current and future users of sewer facilities within the City. The Sewer IFFP identifies the impact on system improvements created by development activity and estimates the proportionate share of the costs of impacts on system improvements that are reasonably related to new development activity. As shown in the Sewer IFFP, the City has considered all revenue sources to finance the impacts on system improvements, including grants, bonds, interfund loans, impact fees, and anticipated or accepted dedications of system improvements. The Sewer IFFP establishes that impact fees are necessary to maintain a proposed level of service that complies with applicable provisions of Section 11-36a-302 of the Impact Fees Act.

- 3. *Plan Certification*. The Sewer IFFP includes a written certification in accordance with Section 11-36a-306 of the Impact Fees Act.
- 4. Adoption of Sewer Impact Fee Facilities Plan. The Sewer IFFP as set forth in **Exhibit A**, is hereby adopted in its entirety by the City in accordance with applicable provisions of the Impact Fees Act.

SECTION V. WRITTEN IMPACT FEE ANALYSIS (IFA)

- 1. Written Impact Fee Analysis Required. Pursuant to Section 11-36a-303 of the Impact Fees Act, each local political subdivision intending to impose an impact fee shall prepare a written analysis of each impact fee to be imposed and a summary of the impact fee analysis designed to be understood by a lay person. The impact fee analysis shall identify the anticipated impact on or consumption of any existing capacity of a public facility by the anticipated development activity; identify the anticipated impact on system improvements required by the anticipated development activity to maintain the established level of service for each public facility; demonstrate how the anticipated impacts are reasonably related to the anticipated development activity; estimate the proportionate share of the costs for existing capacity that will be recouped and the costs of impacts on system improvements that are reasonably related to the new development activity; and identify how the impact fee is calculated.
- 2. Sewer Impact Fee Analysis. The City has, through its consultants, researched and analyzed the factors set forth in Section 11-36a-304 of the Impact Fees Act, including the proportionate share analysis required therein, and has caused to be prepared a Sewer Impact Fee Analysis ("IFA"), as more particularly set forth in Exhibit B, attached hereto and incorporated herein by this reference. The Sewer IFA identifies the impacts upon public facilities required by the development activity and demonstrates how those impacts on system improvements are reasonably related to the development activity, estimates the proportionate share of the costs of impacts on system improvements that are reasonably related to the development activity, and identify how the Sewer Impact Fees are calculated.
- 3. Analysis Certification. The Sewer IFA includes a written certification in accordance with Section 11-36a-306 of the Impact Fees Act.
- Adoption of Sewer Impact Fee Analysis. The Sewer IFA as set forth in Exhibit B, is hereby adopted in its entirety by the City in accordance with applicable provisions of the Impact Fees Act.

SECTION VI. IMPACT FEE SCHEDULE AND FORMULA

 Impact Fee Schedule or Formula Required. Pursuant to Section 11-36a-402 of the Impact Fees Act, the City is required to provide a schedule of impact fees for each type of development activity that specifies the amount of the impact fee to be imposed for each type of system improvement or the formula that the City will use to calculate each impact fee. 2 Maximum Sewer Impact Fee Schedule. Based on the Sewer IFA, the maximum Sewer Impact Fees which the City may impose on development activity within the defined Service Area is based on the following formula and specified fees:

Non-Standard Users Impact Fee = (Average Gallons per Day/200)

x \$4416

Single Family Residential Fee = \$4416 Max per unit

Multi-Family / Non-Residential Fee = \$4416 per 16 Fixture Units

based on the 2015 International

Residential Code.

In accordance with Section 11-36a-402 of the Impact Fees Act, the City is authorized to adjust the standard impact fee at the time the fee is charged to respond to (i) an unusual circumstance found in specific cases, (ii) a request is made for a prompt and individualized impact fee review for the development activity of the state, a school district, or a charter school and an offset or credit for a public facility for which an impact fee has been or will be collected, or (iii) a developer provides studies and data which how specific adjustments of the fee are applicable to the intended use(s).

3. Developer Credits. In accordance with Section 11-36a-402 of the Impact Fees Act, a developer may be allowed a credit against Sewer Impact Fees or proportionate reimbursement of Sewer Impact Fees if the developer dedicates land for a system improvement, builds and dedicates some or all of a system improvement; or dedicates a public facility that the City and the developer agree will reduce the need for a system improvement; provided that the system improvement is: (i) identified in the City's Sewer IFFP; and (ii) is required by the City as a condition of approving the development activity. To the extent required in Section 11-36a-402, the City shall provide a credit against Sewer Impact Fees for any dedication of land for, improvement to, or new construction of, any system improvements provided by the developer if the facilities are system improvements, as defined herein and included in the Sewer IFFP; or are dedicated to the public and offset the need for an identified system improvement.

SECTION VII. CALCULATION OF IMPACT FEES

- 1. Impact Fee Calculations. Pursuant to Section 11-36a-305, in calculating the proposed Sewer Impact Fees, the City has based such amounts calculated on realistic estimates and the assumptions underlying such estimates are more particularly disclosed in the Sewer IFA set forth in **Exhibit B**.
- 2. Previously Incurred Costs. To the extent that new growth and development will be served by previously constructed improvements, the City's Sewer Impact Fees may include public facility costs and outstanding bond costs related to the Sewer improvements previously incurred by the City. These costs may include all projects included in the Sewer IFFP which are under construction or completed but have not been utilized to their capacity, as evidenced by outstanding debt obligations. Any

future debt obligations determined to be necessitated by growth activity will also be included to offset the costs of future capital projects.

SECTION VIII. NOTICE AND HEARING

- 1. Notice. All noticing requirements set forth in the Impact Fees Act, including, but not limited to, provisions of Title 11, Chapter 36a, Part 501-504, have been provided. Copies of the Sewer IFFP and Sewer IFA, together with a summary designed to be understood by a lay person, and this Impact Fee Ordinance, have been made available to the public by placing said materials, in the Santaquin City Library and the Community Development Offices located in Santaquin City Hall at least ten (10) days before the public hearing. Notice has also been provided in accordance with applicable provisions of *Utah Code Ann*. § 10-9a-205.
- 2 Hearing. The City Council held a public hearing regarding the Sewer IFFP, the Sewer IFA, and this Sewer Impact Fee Ordinance, on January 4, 2017, and a copy of the Ordinance was available in its substantially final form at the City Recorder's Office in the Santaquin City Hall before the date of the hearing, all in conformity with the requirements of *Utah Code Ann*. § 10-9a-205 and applicable noticing provisions of the Impact Fees Act.

Section IX. Miscellaneous Provisions

- 1. <u>Contrary Provisions Repealed.</u> Any and all other provisions of the Santaquin City Code that are contrary to the provisions of this Ordinance are hereby repealed.
- 2. Codification, Inclusion in the Code, and Scrivener's Errors. It is the intent of the City Council that the provisions of this ordinance be made part of the Santaquin City Code as adopted, that sections of this ordinance may be re-numbered or re-lettered, that the word ordinance may be changed to section, chapter, or other such appropriate word or phrase in order to accomplish such intent regardless of whether such inclusion in a code is accomplished. Sections of the ordinance may be renumbered or re-lettered. Typographical errors which do not affect the intent of this ordinance may be authorized by the City without need of public hearing by its filing a corrected or re-codified copy of the same with the City Recorder.
- 3. <u>Severability.</u> If any section, phrase, sentence, or portion of this ordinance is for any reason held invalid or unconstitutional by any court of competent jurisdiction, such portion shall be deemed a separate, distinct, and independent provision, and such holding shall not affect the validity of the remaining portions thereof.
- 4. Other Impact Fees Not Repealed. Except as otherwise specifically provided herein, this Sewer Impact Fee Ordinance shall not repeal, modify or affect any impact fee of the City in existence as of the effective date of this Ordinance.

Section X. Effective Date.

The City Recorder shall deposit a copy of this ordinance in the official records of the City on January 4, 2017, and before 5:00 p.m. on that day, shall place a copy of this ordinance in three places within the City. This ordinance shall become effective at 5:00 p.m. on January 5, 2017.

PASSED AND APPROVED this 4th day of January, 2017.

I. INTRODUCTION

A. Purpose

The purpose of the Sanitary Sewer Impact Fee Facilities Plan (IFFP) is to fulfill the requirements established in Utah Code Title 11 Chapter 36a, the "Impact Fees Act" relative to impact fee facilities plans. Appendix A contains the Impact Fee Act (Enacted by Chapter 47, 2011 General Session).

B. Background

The Sanitary Sewer Master Plan and Capital Facilities Plan (MP & CFP) is a document that establishes long term plans for Santaquin City's sanitary sewer infrastructure. It also performs the following functions pertinent to the Impact Fee Facilities Plan:

- 1. Identifies the level of service
- 2. Distinguishes between system improvements and project improvements
- 3. Identifies system improvements that will be required in the future to accommodate future growth and associated costs
- 4. Identifies cost sharing based on proportional historical, current, and projected future growth.
- 5. Evaluates available funding sources
- 6. Recommends a schedule of project construction based on projected growth rates and prioritizes projects

This IFFP document extracts information from the 2016 Sanitary Sewer MP & CFP to provide the information that becomes the foundation for the Sanitary Sewer Impact Fee Analysis (IFA).

Appendix B contains the Sanitary Sewer MP & CFP by reference.

C. Scope

The Sanitary Sewer IFFP takes results and documentation from the MP & CFP and supplements it to provide the basis needed to complete the Sanitary Sewer Impact Fee Analysis. It is the intent that this document comply with the Utah Impact Fee Act as it currently exists.

II. LEVEL OF SERVICE

A. Level of Service from Sanitary Sewer Master Plan and Capital Facilities Plan

The 2016 Sanitary Sewer MP & CFP in Appendix B contains the sanitary sewer system level of service established for Santaquin City.

B. Service Areas

Utah Code requires the impact fee enactment to establish one or more service areas within which impact fees will be imposed. The impact fee related costs identified in this document will be assessed to a single service area encompassing the entire service area of the Santaquin sanitary sewer system.

III. EXISTING AND FUTURE SANITARY SEWER SYSTEM DEMANDS

The Sanitary Sewer MP & CFP contains a detailed description of existing and future demands on the sanitary sewer system. It illustrates the impact of future development on the system. See Appendix B for more information.

IV. EXISTING SYSTEM IMPROVEMENTS WITH RESERVE CAPACITY

Shown on the following pages are system facilities that have reserve capacity available to accommodate future growth, as well as the proportion of the facility capacity that is available for future growth. This existing capacity will gradually be consumed as development occurs.

A. Reserve Capacity of Collection/Transmission System

We evaluated the capacity of all modeled collection and transmission system pipelines that were deemed to be a system improvement according to the definition in the 2016 Sanitary Sewer MP & CFP and the Impact Fee Act. Most of these pipelines are at or over 8 inches in diameter. The process of determining reserve capacity in the collection/transmission system improvements is as follows:

 Identify existing q/Qfull (peak flow divided by the maximum capacity of the pipe) in each existing pipe segment identified as a system improvement.

- 2. Identify buildout q/Qfull in the same existing pipe segments. In most cases the pipe would still have the ability to carry more flow at buildout, but we are only counting that portion of capacity that will actually get consumed for reserve capacity calculations.
- 3. Calculate the weighted average existing q/Qfull and the weighted average buildout q/Qfull for all pipes of a given size (weighted based on the length of the segment).
- 4. Calculate the reserve capacity as the difference between the weighted average of existing flow and the weighted average of buildout flow.

For the purposes of the 2016 Sanitary Sewer MP, CFP & IFFP, buildout demands are estimated to occur in the year 2060. The master plan identifies 2,835 ERUs in 2014, 4730 ERUs in 2024, and 16,289 ERUs at buildout. For this 2016 Impact Fee Facilities Plan, we interpolated the data shown in the 2016 Sanitary Sewer MP & CFP to calculate the demand and ERUs in 2016 and 2026. We estimate there to be 3199 ERUs in 2016, 5238 ERUs in 2026, and 16,289 ERUs at buildout. We therefore anticipate that 13,090 ERUs will be added between now (considered to be 2016) and buildout. We also anticipate that these ERUs of future growth will consume the portions of existing transmission/ distribution system pipe capacity over the next 44 years.

See Table C-1 in Appendix C for a detailed tabulation of each modeled pipe's 2016, 2026, and buildout q/Qfull, reserve capacity, capacity to be consumed by 2026, historical costs, as well as its impact fee eligible cost. Table C-2 in Appendix C contains similar data for pipes not modeled, and assume q/Qfull flow values match adjacent modeled pipes.

B. Reserve Capacity of the Water Reclamation Facility

The demand, reserve capacity, and capacity to be consumed by 2026 by the WRF is summarized below. These numbers are based on the 2016 Sanitary Sewer Master Plan and Capital Facilities Plan.

Table 1. WRF Reserve Capacity Summary

eq .	Peak Instantaneous Flow (gpm)	Reserve Capacity
20141	759	83%
2016 ²	897	80%
2026 ²	1,501	67%
Buildout	4,562	0%

[%] Needed by 2026

Based on Table 1, the remaining capacity of the WRF in 2016 is 80%, with 13.25% needed by 2026 due to growth.

Similar reserve capacity calculations are performed for other infrastructure with Historic Costs paid for by Santaquin City, and are located in Appendix D.

C. Historic Costs

We used actual historic costs where available. Where they were not available we estimated the year of construction of the facility, we then estimated what it would cost to construct the facility in 2016 (using the same method used to estimate the cost of future system improvements), and calculated an approximate historic cost of construction based on the ratio of the Engineering News Record (ENR) construction cost index (see Table D-9 in Appendix D) between the year of construction and 2016. The reserve capacity to be consumed by 2026 is coupled with the actual or estimated historic cost to determine the impact fee eligible cost.

The total historic costs for modeled transmission/distribution lines eligible for impact fee collection is \$490,663 (see Table C-1 in Appendix C). Historical piping project costs are shown in Appendix D. There were about 32 miles of 6-inch and larger sanitary sewer mains that were not modeled. Santaquin City paid for the installation of part of these pipes. We conservatively estimated their reserve capacity to be the same as the modeled pipe directly downstream. These pipes the City paid for/installed had a total historical cost of \$217,155 (see Table C-2 in Appendix C).

The total construction cost for the WRF was \$18,380,688. The City's portion was \$7,869,642.80 for the WRF plus an additional \$815,045 for the associated piping (see Table D-2 in Appendix D). The percentage of reserve capacity estimated to be used by 2026 is 13.25% (see Table 1). The impact fee eligible cost for the

¹Based on SCADA records

²Estimated by interpolation of 2014, 2024, and buildout data as contained in the master plan

WRF is \$1,042,864. The associated piping cost that is impact fee eligible is captured as part of the non-modeled sanitary sewer pipe total shown above.

The historical cost paid by Santaquin City for the 126 MG Winter Storage Pond #2 was \$1,247,683. Based on calculations shown in Table D-5 in Appendix D, the impact fee eligible amount is 41.5% of the \$1,247,683, or \$\$517,369 (see Table D-5).

The total construction cost for the public works facility was \$2,530,000. The City spread the cost between sanitary sewer, pressure irrigation, culinary water, and parks at 25% each. Thus, sanitary sewer was responsible for \$632,500. Based on calculations shown in Table D-6 in Appendix D, the impact fee eligible amount is 15.57% of the \$632,500, or \$98,507 (see Table D-5).

Table D-7 in Appendix D summarizes other City Projects that were paid for by others. Table D-8 in Appendix D calculates the percent of Project 35 in Table 3 that will be used by 2026 for impact fee calculation purposes.

In addition to historic costs, Santaquin also paid for the master plan and capital facilities plan, impact fee facilities plan, and impact fee analysis. These costs totaled about \$76,250 and are impact fee eligible (see Table D-10 in Appendix D).

Table 2. Summary of Historic Project Costs and Engineering Costs Related to Planning that are Eligible for Impact Fee Collection

	Impact Fee Eligible Cost
Modeled Transmission/Distribution Lines	\$ 490,663
Non-Modeled Transmission/Distribution Lines	\$ 217,155
Wastewater Reclamation Facility	\$ 1,042,864
Winter Storage Pond #2	\$ 517,369
Public Works Building	\$ 98,507
MP/CFP, IFFP, IFA	\$ 78,250
Total	\$ 2,444,808

V. FUTURE PROJECTS TO ACCOMMODATE GROWTH

The 2016 Sanitary Sewer MP & CFP identifies which projects will be needed to accommodate future growth and determines at what point they will be needed. Given the growth rate contained in the master plan, it also calculates what year (or range of years, for later projects) Santaquin expects the projects to be needed.

Projects expected to be needed by 2026 to accommodate growth are listed in Table 3. Projects identified in the 2016 Sanitary Sewer MP & CFP that have been completed (e.g. Public Works Facility) were removed from the list of projects.

Table 3. Sanitary Sewer Projects Needed to Accommodate Future Growth

Project No.	Project Name	To	timated tal Cost		ch Project is ded	(1	Developer Project	City Funds	Impact Fee			
		(Ro	ounde d) 1	ERUs	Year	Impr	ovement)				by 2026

	Total	\$21,118,300			\$ 1,007,625	s -	\$20,110,675	

¹Costs are in 2014 dollars

We have chosen the commonly accepted period of 10 years, which is supported by the following reasoning. Current legislation requires that impact fees collected must be spent within 6 years. Impact fees will be collected as calculated in an IFA based on this IFFP until the IFFP is updated, which should happen no less frequently than every 5 years. So impact fees based on this IFFP may be collected 4 years after its adoption. Those fees would need to be spent within 6 years thereafter, which would be 10 years from the date of IFFP adoption. Thus projects as far as 10 years into the future are included in this IFFP.

VI. FUNDING FUTURE PROJECTS

D. Consideration of Funding Sources

Section 302 (2) of the Impact Fee Act requires the City to "generally consider all revenue sources, including impact fees and anticipated dedication of system improvements, to finance the impacts on system improvements." By doing so,

the City ensures fair and equitable treatment among users and concludes whether impact fees are the most appropriate method to fund the growth.

The Sanitary Sewer MP & CFP considered multiple revenue sources, including impact fees and anticipated dedication of system improvements. It establishes that impact fees are necessary to achieve an equitable allocation to the costs borne in the past and to be borne in the future, in comparison to the benefits already received and yet to be received.

E. Impact Fee Credit

The Impact Fee Act allows a "...credit against impact fees for any dedication of land for, improvement to, or new construction of, any system improvements provided by the developer if the facilities: are system improvements; or are dedicated to the public; and offset the need for an identified system improvement." The improvements do not necessarily need to be made in the proposed development. This plan does not contemplate a credit owed, and any credits given in the future would be negotiated between the developer and the City on a case by case basis as they arise.

APPENDIX A – UTAH IMPACT FEE ACT

Chapter 36a Impact Fees Act

Part 1 General Provisions

11-36a-101 Title.

This chapter is known as the "Impact Fees Act."

Enacted by Chapter 47, 2011 General Session

11-36a-102 Definitions.

As used in this chapter:

(1)

- (a) "Affected entity" means each county, municipality, local district under Title 17B, Limited Purpose Local Government Entities Local Districts, special service district under Title 17D, Chapter 1, Special Service District Act, school district, interlocal cooperation entity established under Chapter 13, Interlocal Cooperation Act, and specified public utility:
 - (i) whose services or facilities are likely to require expansion or significant modification because of the facilities proposed in the proposed impact fee facilities plan; or
 - (ii) that has filed with the local political subdivision or private entity a copy of the general or long-range plan of the county, municipality, local district, special service district, school district, interlocal cooperation entity, or specified public utility.
- (b) "Affected entity" does not include the local political subdivision or private entity that is require under Section 11-36a-501 to provide notice.
- (2) "Charter school" includes:
 - (a) an operating charter school;
 - (b) an applicant for a charter school whose application has been approved by a charter school authorizer as provided in Title 53A, Chapter 1a, Part 5, The Utah Charter Schools Act; and
 - (c) an entity that is working on behalf of a charter school or approved charter applicant to develop or construct a charter school building.
- (3) "Development activity" means any construction or expansion of a building, structure, or use, any change in use of a building or structure, or any changes in the use of land that creates additional demand and need for public facilities.
- (4) "Development approval" means:
 - (a) except as provided in Subsection (4)(b), any written authorization from a local political subdivision that authorizes the commencement of development activity;
 - (b) development activity, for a public entity that may develop without written authorization from a local political subdivision;
 - (c) a written authorization from a public water supplier, as defined in Section 73-1-4, or a private water company:
 - (i) to reserve or provide:
 - (A) a water right;
 - (B) a system capacity; or
 - (C) a distribution facility; or
 - (ii) to deliver for a development activity:
 - (A) culinary water; or

- (B) irrigation water; or
- (d) a written authorization from a sanitary sewer authority, as defined in Section 10-9a-103:
 - (i) to reserve or provide:
 - (A) sewer collection capacity; or
 - (B) treatment capacity; or
 - (ii) to provide sewer service for a development activity.
- (5) "Enactment" means:
 - (a) a municipal ordinance, for a municipality;
 - (b) a county ordinance, for a county; and
 - (c) a governing board resolution, for a local district, special service district, or private entity.
- (6) "Encumber" means:
 - (a) a pledge to retire a debt; or
 - (b) an allocation to a current purchase order or contract.
- (7) "Hookup fee" means a fee for the installation and inspection of any pipe, line, meter, or appurtenance to connect to a gas, water, sewer, storm water, power, or other utility system of a municipality, county, local district, special service district, or private entity.

(8)

- (a) "Impact fee" means a payment of money imposed upon new development activity as a condition of development approval to mitigate the impact of the new development on public infrastructure.
- (b) "Impact fee" does not mean a tax, a special assessment, a building permit fee, a hookup fee, a fee for project improvements, or other reasonable permit or application fee.
- (9) "Impact fee analysis" means the written analysis of each impact fee required by Section 11-36a-303.
- 10) "Impact fee facilities plan" means the plan required by Section 11-36a-301.
- (11) "Level of service" means the defined performance standard or unit of demand for each capital component of a public facility within a service area.

(12)

- (a) "Local political subdivision" means a county, a municipality, a local district under Title 17B, Limited Purpose Local Government Entities Local Districts, or a special service district under Title 17D, Chapter 1, Special Service District Act.
- (b) "Local political subdivision" does not mean a school district, whose impact fee activity is governed by Section 53A-20-100.5.
- (13) "Private entity" means an entity in private ownership with at least 100 individual shareholders, customers, or connections, that is located in a first, second, third, or fourth class county and provides water to an applicant for development approval who is required to obtain water from the private entity either as a:
 - (a) specific condition of development approval by a local political subdivision acting pursuant to a prior agreement, whether written or unwritten, with the private entity; or
 - (b) functional condition of development approval because the private entity:
 - (i) has no reasonably equivalent competition in the immediate market; and
 - (ii) is the only realistic source of water for the applicant's development.

(14)

- (a) "Project improvements" means site improvements and facilities that are:
 - (i) planned and designed to provide service for development resulting from a development activity;
 - (ii) necessary for the use and convenience of the occupants or users of development resulting from a development activity; and

- (iii) not identified or reimbursed as a system improvement.
- (b) "Project improvements" does not mean system improvements.
- (15) "Proportionate share" means the cost of public facility improvements that are roughly proportionate and reasonably related to the service demands and needs of any development activity.
- (16) "Public facilities" means only the following impact fee facilities that have a life expectancy of 10 or more years and are owned or operated by or on behalf of a local political subdivision or private entity:
 - (a) water rights and water supply, treatment, storage, and distribution facilities;
 - (b) wastewater collection and treatment facilities;
 - (c) storm water, drainage, and flood control facilities;
 - (d) municipal power facilities;
 - (e) roadway facilities;
 - (f) parks, recreation facilities, open space, and trails;
 - (g) public safety facilities; or
 - (h) environmental mitigation as provided in Section 11-36a-205.

(17)

- (a) "Public safety facility" means:
 - (i) a building constructed or leased to house police, fire, or other public safety entities; or
 - (ii) a fire suppression vehicle costing in excess of \$500,000.
- (b) "Public safety facility" does not mean a jail, prison, or other place of involuntary incarceration.

(18)

- (a) "Roadway facilities" means a street or road that has been designated on an officially adopted subdivision plat, roadway plan, or general plan of a political subdivision, together with all necessary appurtenances.
- (b) "Roadway facilities" includes associated improvements to a federal or state roadway only when the associated improvements:
 - (i) are necessitated by the new development; and
 - (ii) are not funded by the state or federal government.
- (c) "Roadway facilities" does not mean federal or state roadways.

(19)

- (a) "Service area" means a geographic area designated by an entity that imposes an impact fee on the basis of sound planning or engineering principles in which a public facility, or a defined set of public facilities, provides service within the area.
- (b) "Service area" may include the entire local political subdivision or an entire area served by a private entity.
- (20) "Specified public agency" means:
 - (a) the state;
 - (b) a school district; or
 - (c) a charter school.

(21)

- (a) "System improvements" means:
 - (i) existing public facilities that are:
 - (A) identified in the impact fee analysis under Section 11-36a-304; and
 - (B) designed to provide services to service areas within the community at large; and
 - (ii) future public facilities identified in the impact fee analysis under Section 11-36a-304 that are intended to provide services to service areas within the community at large.
- (b) "System improvements" does not mean project improvements.

mended by Chapter 363, 2014 General Session

Part 2 Impact Fees

11-36a-201 Impact fees.

- (1) A local political subdivision or private entity shall ensure that any imposed impact fees comply with the requirements of this chapter.
- (2) A local political subdivision and private entity may establish impact fees only for those public facilities defined in Section 11-36a-102.
- (3) Nothing in this chapter may be construed to repeal or otherwise eliminate an impact fee in effect on the effective date of this chapter that is pledged as a source of revenues to pay bonded indebtedness that was incurred before the effective date of this chapter.

Enacted by Chapter 47, 2011 General Session

11-36a-202 Prohibitions on impact fees.

- (1) A local political subdivision or private entity may not:
 - (a) impose an impact fee to:
 - (i) cure deficiencies in a public facility serving existing development:
 - (ii) raise the established level of service of a public facility serving existing development;
 - (iii) recoup more than the local political subdivision's or private entity's costs actually incurred for excess capacity in an existing system improvement; or
 - (iv) include an expense for overhead, unless the expense is calculated pursuant to a methodology that is consistent with:
 - (A) generally accepted cost accounting practices; and
 - (B) the methodological standards set forth by the federal Office of Management and Budget for federal grant reimbursement;
 - (b) delay the construction of a school or charter school because of a dispute with the school or charter school over impact fees; or
 - (c) impose or charge any other fees as a condition of development approval unless those fees are a reasonable charge for the service provided.

(2)

- (a) Notwithstanding any other provision of this chapter, a political subdivision or private entity may not impose an impact fee:
 - (i) on residential components of development to pay for a public safety facility that is a fire suppression vehicle;
 - (ii) on a school district or charter school for a park, recreation facility, open space, or trail;
 - (iii) on a school district or charter school unless:
 - (A) the development resulting from the school district's or charter school's development activity directly results in a need for additional system improvements for which the impact fee is imposed; and
 - (B) the impact fee is calculated to cover only the school district's or charter school's proportionate share of the cost of those additional system improvements; or

- (iv) to the extent that the impact fee includes a component for a law enforcement facility, on development activity for:
 - (A) the Utah National Guard;
 - (B) the Utah Highway Patrol; or
 - (C) a state institution of higher education that has its own police force.

(b)

- (i) Notwithstanding any other provision of this chapter, a political subdivision or private entity may not impose an impact fee on development activity that consists of the construction of a school, whether by a school district or a charter school, if:
 - (A) the school is intended to replace another school, whether on the same or a different parcel;
 - (B) the new school creates no greater demand or need for public facilities than the school or school facilities, including any portable or modular classrooms that are on the site of the replaced school at the time that the new school is proposed; and
 - (C) the new school and the school being replaced are both within the boundary of the local political subdivision or the jurisdiction of the private entity.
- (ii) If the imposition of an impact fee on a new school is not prohibited under Subsection (2)(b) (i) because the new school creates a greater demand or need for public facilities than the school being replaced, the impact fee shall be based only on the demand or need that the new school creates for public facilities that exceeds the demand or need that the school being replaced creates for those public facilities.
- (c) Notwithstanding any other provision of this chapter, a political subdivision or private entity may impose an impact fee for a road facility on the state only if and to the extent that:
 - (i) the state's development causes an impact on the road facility; and
 - (ii) the portion of the road facility related to an impact fee is not funded by the state or by the federal government.
- (3) Notwithstanding any other provision of this chapter, a local political subdivision may impose and collect impact fees on behalf of a school district if authorized by Section 53A-20-100.5.

Enacted by Chapter 47, 2011 General Session

11-36a-203 Private entity assessment of impact fees -- Charges for water rights, physical infrastructure -- Notice -- Audit.

- (1) A private entity:
 - (a) shall comply with the requirements of this chapter before imposing an impact fee; and
 - (b) except as otherwise specified in this chapter, is subject to the same requirements of this chapter as a local political subdivision.
- (2) A private entity may only impose a charge for water rights or physical infrastructure necessary to provide water or sewer facilities by imposing an impact fee.
- (3) Where notice and hearing requirements are specified, a private entity shall comply with the notice and hearing requirements for local districts.
- (4) A private entity that assesses an impact fee under this chapter is subject to the audit requirements of Title 51, Chapter 2a, Accounting Reports from Political Subdivisions, Interlocal Organizations, and Other Local Entities Act.

Enacted by Chapter 47, 2011 General Session

11-36a-204 Other names for impact fees.

- (1) A fee that meets the definition of impact fee under Section 11-36a-102 is an impact fee subject to this chapter, regardless of what term the local political subdivision or private entity uses to refer to the fee.
- (2) A local political subdivision or private entity may not avoid application of this chapter to a fee that meets the definition of an impact fee under Section 11-36a-102 by referring to the fee by another name.

Enacted by Chapter 47, 2011 General Session

11-36a-205 Environmental mitigation impact fees.

Notwithstanding the requirements and prohibitions of this chapter, a local political subdivision may impose and assess an impact fee for environmental mitigation when:

- (1) the local political subdivision has formally agreed to fund a Habitat Conservation Plan to resolve conflicts with the Endangered Species Act of 1973, 16 U.S.C. Sec. 1531, et seq. or other state or federal environmental law or regulation;
- (2) the impact fee bears a reasonable relationship to the environmental mitigation required by the Habitat Conservation Plan; and
- (3) the legislative body of the local political subdivision adopts an ordinance or resolution:
 - (a) declaring that an impact fee is required to finance the Habitat Conservation Plan;
 - (b) establishing periodic sunset dates for the impact fee; and
 - (c) requiring the legislative body to:
 - (i) review the impact fee on those sunset dates;
 - (ii) determine whether or not the impact fee is still required to finance the Habitat Conservation Plan; and
 - (iii) affirmatively reauthorize the impact fee if the legislative body finds that the impact fee must remain in effect.

Enacted by Chapter 47, 2011 General Session

Part 3 Establishing an Impact Fee

11-36a-301 Impact fee facilities plan.

- (1) Before imposing an impact fee, each local political subdivision or private entity shall, except as provided in Subsection (3), prepare an impact fee facilities plan to determine the public facilities required to serve development resulting from new development activity.
- (2) A municipality or county need not prepare a separate impact fee facilities plan if the general plan required by Section 10-9a-401 or 17-27a-401, respectively, contains the elements required by Section 11-36a-302.
- (3) A local political subdivision or a private entity with a population, or serving a population, of less than 5,000 as of the last federal census that charges impact fees of less than \$250,000 annually need not comply with the impact fee facilities plan requirements of this part, but shall ensure that:
 - (a) the impact fees that the local political subdivision or private entity imposes are based upon a reasonable plan that otherwise complies with the common law and this chapter; and
 - (b) each applicable notice required by this chapter is given.

Amended by Chapter 200, 2013 General Session

11-36a-302 Impact fee facilities plan requirements -- Limitations -- School district or charter school.

(1)

- (a) An impact fee facilities plan shall:
 - (i) identify the existing level of service;
 - (ii) subject to Subsection (1)(c), establish a proposed level of service;
 - (iii) identify any excess capacity to accommodate future growth at the proposed level of service;
 - (iv) identify demands placed upon existing public facilities by new development activity at the proposed level of service; and
 - (v) identify the means by which the political subdivision or private entity will meet those growth demands.
- (b) A proposed level of service may diminish or equal the existing level of service.
- (c) A proposed level of service may:
 - (i) exceed the existing level of service if, independent of the use of impact fees, the political subdivision or private entity provides, implements, and maintains the means to increase the existing level of service for existing demand within six years of the date on which new growth is charged for the proposed level of service; or
 - (ii) establish a new public facility if, independent of the use of impact fees, the political subdivision or private entity provides, implements, and maintains the means to increase the existing level of service for existing demand within six years of the date on which new growth is charged for the proposed level of service.
- (2) In preparing an impact fee facilities plan, each local political subdivision shall generally consider all revenue sources to finance the impacts on system improvements, including:
 - (a) grants;
 - (b) bonds;
 - (c) interfund loans;
 - (d) impact fees; and
 - (e) anticipated or accepted dedications of system improvements.
- (3) A local political subdivision or private entity may only impose impact fees on development activities when the local political subdivision's or private entity's plan for financing system improvements establishes that impact fees are necessary to maintain a proposed level of service that complies with Subsection (1)(b) or (c).

(4)

- (a) Subject to Subsection (4)(c), the impact fee facilities plan shall include a public facility for which an impact fee may be charged or required for a school district or charter school if the local political subdivision is aware of the planned location of the school district facility or charter school:
 - (i) through the planning process; or
 - (ii) after receiving a written request from a school district or charter school that the public facility be included in the impact fee facilities plan.
- (b) If necessary, a local political subdivision or private entity shall amend the impact fee facilities plan to reflect a public facility described in Subsection (4)(a).

(c)

- (i) In accordance with Subsections 10-9a-305(3) and 17-27a-305(3), a local political subdivision may not require a school district or charter school to participate in the cost of any roadway or sidewalk.
- (ii) Notwithstanding Subsection (4)(c)(i), if a school district or charter school agrees to build a roadway or sidewalk, the roadway or sidewalk shall be included in the impact fee facilities plan if the local jurisdiction has an impact fee facilities plan for roads and sidewalks.

Amended by Chapter 200, 2013 General Session

11-36a-303 Impact fee analysis.

- (1) Subject to the notice requirements of Section 11-36a-504, each local political subdivision or private entity intending to impose an impact fee shall prepare a written analysis of each impact fee.
- (2) Each local political subdivision or private entity that prepares an impact fee analysis under Subsection (1) shall also prepare a summary of the impact fee analysis designed to be understood by a lay person.

Enacted by Chapter 47, 2011 General Session

11-36a-304 Impact fee analysis requirements.

- (1) An impact fee analysis shall:
 - (a) identify the anticipated impact on or consumption of any existing capacity of a public facility by the anticipated development activity;
 - (b) identify the anticipated impact on system improvements required by the anticipated development activity to maintain the established level of service for each public facility;
 - (c) subject to Subsection (2), demonstrate how the anticipated impacts described in Subsections (1)(a) and (b) are reasonably related to the anticipated development activity;
 - (d) estimate the proportionate share of:
 - (i) the costs for existing capacity that will be recouped; and
 - (ii) the costs of impacts on system improvements that are reasonably related to the new development activity; and
 - (e) based on the requirements of this chapter, identify how the impact fee was calculated.
- (2) In analyzing whether or not the proportionate share of the costs of public facilities are reasonably related to the new development activity, the local political subdivision or private entity, as the case may be, shall identify, if applicable:
 - (a) the cost of each existing public facility that has excess capacity to serve the anticipated development resulting from the new development activity;
 - (b) the cost of system improvements for each public facility;
 - (c) other than impact fees, the manner of financing for each public facility, such as user charges, special assessments, bonded indebtedness, general taxes, or federal grants;
 - (d) the relative extent to which development activity will contribute to financing the excess capacity of and system improvements for each existing public facility, by such means as user charges, special assessments, or payment from the proceeds of general taxes;
 - (e) the relative extent to which development activity will contribute to the cost of existing public facilities and system improvements in the future;
 - (f) the extent to which the development activity is entitled to a credit against impact fees because the development activity will dedicate system improvements or public facilities that will offset the demand for system improvements, inside or outside the proposed development;

- (g) extraordinary costs, if any, in servicing the newly developed properties; and
- (h) the time-price differential inherent in fair comparisons of amounts paid at different times.

Enacted by Chapter 47, 2011 General Session

11-36a-305 Calculating impact fees.

- (1) In calculating an impact fee, a local political subdivision or private entity may include:
 - (a) the construction contract price;
 - (b) the cost of acquiring land, improvements, materials, and fixtures;
 - (c) the cost for planning, surveying, and engineering fees for services provided for and directly related to the construction of the system improvements; and
 - (d) for a political subdivision, debt service charges, if the political subdivision might use impact fees as a revenue stream to pay the principal and interest on bonds, notes, or other obligations issued to finance the costs of the system improvements.
- (2) In calculating an impact fee, each local political subdivision or private entity shall base amounts calculated under Subsection (1) on realistic estimates, and the assumptions underlying those estimates shall be disclosed in the impact fee analysis.

Enacted by Chapter 47, 2011 General Session

11-36a-306 Certification of impact fee analysis.

- (1) An impact fee facilities plan shall include a written certification from the person or entity that prepares the impact fee facilities plan that states the following:"I certify that the attached impact fee facilities plan:
 - 1. includes only the costs of public facilities that are:
 - a. allowed under the Impact Fees Act; and
 - b. actually incurred; or
 - c. projected to be incurred or encumbered within six years after the day on which each impact fee is paid;
 - 2. does not include:
 - a. costs of operation and maintenance of public facilities;
 - b. costs for qualifying public facilities that will raise the level of service for the facilities, through impact fees, above the level of service that is supported by existing residents; or
 - c. an expense for overhead, unless the expense is calculated pursuant to a methodology that is consistent with generally accepted cost accounting practices and the methodological standards set forth by the federal Office of Management and Budget for federal grant reimbursement; and
 - 3. complies in each and every relevant respect with the Impact Fees Act."
- (2) An impact fee analysis shall include a written certification from the person or entity that prepares the impact fee analysis which states as follows:"I certify that the attached impact fee analysis:
 - 1. includes only the costs of public facilities that are:
 - a. allowed under the Impact Fees Act; and
 - b. actually incurred; or
 - c. projected to be incurred or encumbered within six years after the day on which each impact fee is paid;
 - 2. does not include:
 - a. costs of operation and maintenance of public facilities;

- b. costs for qualifying public facilities that will raise the level of service for the facilities, through impact fees, above the level of service that is supported by existing residents; or
- c. an expense for overhead, unless the expense is calculated pursuant to a methodology that is consistent with generally accepted cost accounting practices and the methodological standards set forth by the federal Office of Management and Budget for federal grant reimbursement:
- 3. offsets costs with grants or other alternate sources of payment; and
- 4. complies in each and every relevant respect with the Impact Fees Act."

Amended by Chapter 278, 2013 General Session

Part 4 Enactment of Impact Fees

11-36a-401 Impact fee enactment.

(1)

- (a) A local political subdivision or private entity wishing to impose impact fees shall pass an impact fee enactment in accordance with Section 11-36a-402.
- (b) An impact fee imposed by an impact fee enactment may not exceed the highest fee justified by the impact fee analysis.
- (2) An impact fee enactment may not take effect until 90 days after the day on which the impact fee enactment is approved.

Enacted by Chapter 47, 2011 General Session

11-36a-402 Required provisions of impact fee enactment.

- (1) A local political subdivision or private entity shall ensure, in addition to the requirements described in Subsections (2) and (3), that an impact fee enactment contains:
 - (a) a provision establishing one or more service areas within which the local political subdivision or private entity calculates and imposes impact fees for various land use categories;

(b)

- (i) a schedule of impact fees for each type of development activity that specifies the amount of the impact fee to be imposed for each type of system improvement; or
- (ii) the formula that the local political subdivision or private entity, as the case may be, will use to calculate each impact fee;
- (c) a provision authorizing the local political subdivision or private entity, as the case may be, to adjust the standard impact fee at the time the fee is charged to:
 - (i) respond to:
 - (A) unusual circumstances in specific cases; or
 - (B) a request for a prompt and individualized impact fee review for the development activity of the state, a school district, or a charter school and an offset or credit for a public facility for which an impact fee has been or will be collected; and
 - (ii) ensure that the impact fees are imposed fairly; and
- (d) a provision governing calculation of the amount of the impact fee to be imposed on a particular development that permits adjustment of the amount of the impact fee based upon studies and data submitted by the developer.

- (2) A local political subdivision or private entity shall ensure that an impact fee enactment allows a developer, including a school district or a charter school, to receive a credit against or proportionate reimbursement of an impact fee if the developer:

- (a) dedicates land for a system improvement;
- (b) builds and dedicates some or all of a system improvement; or
- (c) dedicates a public facility that the local political subdivision or private entity and the developer agree will reduce the need for a system improvement.
- (3) A local political subdivision or private entity shall include a provision in an impact fee enactment that requires a credit against impact fees for any dedication of land for, improvement to, or new construction of, any system improvements provided by the developer if the facilities:
 - (a) are system improvements; or
 - (b)
 - (i) are dedicated to the public; and
 - (ii) offset the need for an identified system improvement.

Enacted by Chapter 47, 2011 General Session

11-36a-403 Other provisions of impact fee enactment.

- (1) A local political subdivision or private entity may include a provision in an impact fee enactment that:
 - (a) provides an impact fee exemption for:
 - (i) development activity attributable to:
 - (A) low income housing:
 - (B) the state;
 - (C) subject to Subsection (2), a school district; or
 - (D) subject to Subsection (2), a charter school; or
 - (ii) other development activity with a broad public purpose; and
 - (b) except for an exemption under Subsection (1)(a)(i)(A), establishes one or more sources of funds other than impact fees to pay for that development activity.
- (2) An impact fee enactment that provides an impact fee exemption for development activity attributable to a school district or charter school shall allow either a school district or a charter school to qualify for the exemption on the same basis.
- (3) An impact fee enactment that repeals or suspends the collection of impact fees is exempt from the notice requirements of Section 11-36a-504.

Enacted by Chapter 47, 2011 General Session

Part 5 Notice

11-36a-501 Notice of intent to prepare an impact fee facilities plan.

- (1) Before preparing or amending an impact fee facilities plan, a local political subdivision or private entity shall provide written notice of its intent to prepare or amend an impact fee facilities plan.
- (2) A notice required under Subsection (1) shall:
 - (a) indicate that the local political subdivision or private entity intends to prepare or amend an impact fee facilities plan;

- (b) describe or provide a map of the geographic area where the proposed impact fee facilities will be located; and
- (c) subject to Subsection (3), be posted on the Utah Public Notice Website created under Section 63F-1-701.
- (3) For a private entity required to post notice on the Utah Public Notice Website under Subsection (2)(c):
 - (a) the private entity shall give notice to the general purpose local government in which the private entity's private business office is located; and
 - (b) the general purpose local government described in Subsection (3)(a) shall post the notice on the Utah Public Notice Website.

Enacted by Chapter 47, 2011 General Session

11-36a-502 Notice to adopt or amend an impact fee facilities plan.

- (1) If a local political subdivision chooses to prepare an independent impact fee facilities plan rather than include an impact fee facilities element in the general plan in accordance with Section 11-36a-301, the local political subdivision shall, before adopting or amending the impact fee facilities plan:
 - (a) give public notice, in accordance with Subsection (2), of the plan or amendment at least 10 days before the day on which the public hearing described in Subsection (1)(d) is scheduled;
 - (b) make a copy of the plan or amendment, together with a summary designed to be understood by a lay person, available to the public;
 - (c) place a copy of the plan or amendment and summary in each public library within the local political subdivision; and
 - (d) hold a public hearing to hear public comment on the plan or amendment.
- (2) With respect to the public notice required under Subsection (1)(a):
 - (a) each municipality shall comply with the notice and hearing requirements of, and, except as provided in Subsection 11-36a-701(3)(b)(ii), receive the protections of Sections 10-9a-205 and 10-9a-801 and Subsection 10-9a-502(2);
 - (b) each county shall comply with the notice and hearing requirements of, and, except as provided in Subsection 11-36a-701(3)(b)(ii), receive the protections of Sections 17-27a-205 and 17-27a-801 and Subsection 17-27a-502(2); and
 - (c) each local district, special service district, and private entity shall comply with the notice and hearing requirements of, and receive the protections of, Section 17B-1-111.
- (3) Nothing contained in this section or Section 11-36a-503 may be construed to require involvement by a planning commission in the impact fee facilities planning process.

Enacted by Chapter 47, 2011 General Session

11-36a-503 Notice of preparation of an impact fee analysis.

- (1) Before preparing or contracting to prepare an impact fee analysis, each local political subdivision or, subject to Subsection (2), private entity shall post a public notice on the Utah Public Notice Website created under Section 63F-1-701.
- (2) For a private entity required to post notice on the Utah Public Notice Website under Subsection (1):
 - (a) the private entity shall give notice to the general purpose local government in which the private entity's primary business is located; and

(b) the general purpose local government described in Subsection (2)(a) shall post the notice on the Utah Public Notice Website.

Enacted by Chapter 47, 2011 General Session

11-36a-504 Notice of intent to adopt impact fee enactment -- Hearing -- Protections.

- (1) Before adopting an impact fee enactment:
 - (a) a municipality legislative body shall:
 - (i) comply with the notice requirements of Section 10-9a-205 as if the impact fee enactment were a land use ordinance;
 - (ii) hold a hearing in accordance with Section 10-9a-502 as if the impact fee enactment were a land use ordinance; and
 - (iii) except as provided in Subsection 11-36a-701(3)(b)(ii), receive the protections of Section 10-9a-801 as if the impact fee were a land use ordinance;
 - (b) a county legislative body shall:
 - (i) comply with the notice requirements of Section 17-27a-205 as if the impact fee enactment were a land use ordinance;
 - (ii) hold a hearing in accordance with Section 17-27a-502 as if the impact fee enactment were a land use ordinance; and
 - (iii) except as provided in Subsection 11-36a-701(3)(b)(ii), receive the protections of Section 17-27a-801 as if the impact fee were a land use ordinance;
 - (c) a local district or special service district shall:
 - (i) comply with the notice and hearing requirements of Section 17B-1-111; and
 - (ii) receive the protections of Section 17B-1-111;
 - (d) a local political subdivision shall at least 10 days before the day on which a public hearing is scheduled in accordance with this section:
 - (i) make a copy of the impact fee enactment available to the public; and
 - (ii) post notice of the local political subdivision's intent to enact or modify the impact fee, specifying the type of impact fee being enacted or modified, on the Utah Public Notice Website created under Section 63F-1-701; and
 - (e) a local political subdivision shall submit a copy of the impact fee analysis and a copy of the summary of the impact fee analysis prepared in accordance with Section 11-36a-303 on its website or to each public library within the local political subdivision.
- (2) Subsection (1)(a) or (b) may not be construed to require involvement by a planning commission in the impact fee enactment process.

Enacted by Chapter 47, 2011 General Session

Part 6 Impact Fee Proceeds

11-36a-601 Accounting of impact fees.

A local political subdivision that collects an impact fee shall:

(1) establish a separate interest bearing ledger account for each type of public facility for which an impact fee is collected;

- (2) deposit a receipt for an impact fee in the appropriate ledger account established under Subsection (1);
- 3) retain the interest earned on each fund or ledger account in the fund or ledger account;
- (4) at the end of each fiscal year, prepare a report on each fund or ledger account showing:
 - (a) the source and amount of all money collected, earned, and received by the fund or ledger account; and
 - (b) each expenditure from the fund or ledger account; and
- (5) produce a report that:
 - (a) identifies impact fee funds by the year in which they were received, the project from which the funds were collected, the impact fee projects for which the funds were budgeted, and the projected schedule for expenditure;
 - (b) is in a format developed by the state auditor;
 - (c) is certified by the local political subdivision's chief financial officer; and
 - (d) is transmitted annually to the state auditor.

Enacted by Chapter 47, 2011 General Session

11-36a-602 Expenditure of impact fees.

- (1) A local political subdivision may expend impact fees only for a system improvement:
 - (a) identified in the impact fee facilities plan; and
 - (b) for the specific public facility type for which the fee was collected.

(2)

- (a) Except as provided in Subsection (2)(b), a local political subdivision shall expend or encumber the impact fees for a permissible use within six years of their receipt.
- (b) A local political subdivision may hold the fees for longer than six years if it identifies, in writing:
 - (i) an extraordinary and compelling reason why the fees should be held longer than six years; and
 - (ii) an absolute date by which the fees will be expended.

Enacted by Chapter 47, 2011 General Session

11-36a-603 Refunds.

A local political subdivision shall refund any impact fee paid by a developer, plus interest earned, when:

- (1) the developer does not proceed with the development activity and has filed a written request for a refund;
- (2) the fee has not been spent or encumbered; and
- (3) no impact has resulted.

Enacted by Chapter 47, 2011 General Session

Part 7 Challenges

11-36a-701 Impact fee challenge.

(1) A person or an entity residing in or owning property within a service area, or an organization, association, or a corporation representing the interests of persons or entities owning property within a service area, has standing to file a declaratory judgment action challenging the validity of an impact fee.

(2)

- (a) A person or an entity required to pay an impact fee who believes the impact fee does not meet the requirements of law may file a written request for information with the local political subdivision who established the impact fee.
- (b) Within two weeks after the receipt of the request for information under Subsection (2)(a), the local political subdivision shall provide the person or entity with the impact fee analysis, the impact fee facilities plan, and any other relevant information relating to the impact fee.

(3)

- (a) Subject to the time limitations described in Section 11-36a-702 and procedures set forth in Section 11-36a-703, a person or an entity that has paid an impact fee that was imposed by a local political subdivision may challenge:
 - (i) if the impact fee enactment was adopted on or after July 1, 2000:
 - (A) subject to Subsection (3)(b)(i) and except as provided in Subsection (3)(b)(ii), whether the local political subdivision complied with the notice requirements of this chapter with respect to the imposition of the impact fee; and
 - (B) whether the local political subdivision complied with other procedural requirements of this chapter for imposing the impact fee; and
 - (ii) except as limited by Subsection (3)(c), the impact fee.

(b)

- (i) The sole remedy for a challenge under Subsection (3)(a)(i)(A) is the equitable remedy of requiring the local political subdivision to correct the defective notice and repeat the process.
- (ii) The protections given to a municipality under Section 10-9a-801 and to a county under Section 17-27a-801 do not apply in a challenge under Subsection (3)(a)(i)(A).
- (c) The sole remedy for a challenge under Subsection (3)(a)(ii) is a refund of the difference between what the person or entity paid as an impact fee and the amount the impact fee should have been if it had been correctly calculated.

(4)

- (a) Subject to Subsection (4)(d), if an impact fee that is the subject of an advisory opinion under Section 13-43-205 is listed as a cause of action in litigation, and that cause of action is litigated on the same facts and circumstances and is resolved consistent with the advisory opinion:
 - (i) the substantially prevailing party on that cause of action:
 - (A) may collect reasonable attorney fees and court costs pertaining to the development of that cause of action from the date of the delivery of the advisory opinion to the date of the court's resolution; and
 - (B) shall be refunded an impact fee held to be in violation of this chapter, based on the difference between the impact fee paid and what the impact fee should have been if the government entity had correctly calculated the impact fee; and
 - (ii) in accordance with Section 13-43-206, a government entity shall refund an impact fee held to be in violation of this chapter to the person who was in record title of the property on the day on which the impact fee for the property was paid if:

- (A) the impact fee was paid on or after the day on which the advisory opinion on the impact fee was issued but before the day on which the final court ruling on the impact fee is issued; and
- (B) the person described in Subsection (3)(a)(ii) requests the impact fee refund from the government entity within 30 days after the day on which the court issued the final ruling on the impact fee.
- (b) A government entity subject to Subsection (3)(a)(ii) shall refund the impact fee based on the difference between the impact fee paid and what the impact fee should have been if the government entity had correctly calculated the impact fee.
- (c) Subsection (4) may not be construed to create a new cause of action under land use law.
- (d) Subsection (3)(a) does not apply unless the resolution described in Subsection (3)(a) is final.

Enacted by Chapter 47, 2011 General Session

11-36a-702 Time limitations.

- (1) A person or an entity that initiates a challenge under Subsection 11-36a-701(3)(a) may not initiate that challenge unless it is initiated within:
 - (a) for a challenge under Subsection 11-36a-701(3)(a)(i)(A), 30 days after the day on which the person or entity pays the impact fee;
 - (b) for a challenge under Subsection 11-36a-701(3)(a)(i)(B), 180 days after the day on which the person or entity pays the impact fee; or
 - (c) for a challenge under Subsection 11-36a-701(3)(a)(ii), one year after the day on which the person or entity pays the impact fee.
- 2) The deadline to file an action in district court is tolled from the date that a challenge is filed using an administrative appeals procedure described in Section 11-36a-703 until 30 days after the day on which a final decision is rendered in the administrative appeals procedure.

Enacted by Chapter 47, 2011 General Session

11-36a-703 Procedures for challenging an impact fee.

(1)

- (a) A local political subdivision may establish, by ordinance or resolution, or a private entity may establish by prior written policy, an administrative appeals procedure to consider and decide a challenge to an impact fee.
- (b) If the local political subdivision or private entity establishes an administrative appeals procedure, the local political subdivision shall ensure that the procedure includes a requirement that the local political subdivision make its decision no later than 30 days after the day on which the challenge to the impact fee is filed.
- (2) A challenge under Subsection 11-36a-701(3)(a) is initiated by filing:
 - (a) if the local political subdivision or private entity has established an administrative appeals procedure under Subsection (1), the necessary document, under the administrative appeals procedure, for initiating the administrative appeal;
 - (b) a request for arbitration as provided in Section 11-36a-705; or
 - (c) an action in district court.
- (3) The sole remedy for a successful challenge under Subsection 11-36a-701(1), which determines that an impact fee process was invalid, or an impact fee is in excess of the fee allowed under this act, is a declaration that, until the local political subdivision or private entity enacts a new

- impact fee study, from the date of the decision forward, the entity may charge an impact fee only as the court has determined would have been appropriate if it had been properly enacted.
- (4) Subsections (2), (3), 11-36a-701(3), and 11-36a-702(1) may not be construed as requiring a person or an entity to exhaust administrative remedies with the local political subdivision before filing an action in district court under Subsections (2), (3), 11-36a-701(3), and 11-36a-702(1).
- (5) The judge may award reasonable attorney fees and costs to the prevailing party in an action brought under this section.
- (6) This chapter may not be construed as restricting or limiting any rights to challenge impact fees that were paid before the effective date of this chapter.

Amended by Chapter 200, 2013 General Session

11-36a-704 Mediation.

- (1) In addition to the methods of challenging an impact fee under Section 11-36a-701, a specified public agency may require a local political subdivision or private entity to participate in mediation of any applicable impact fee.
- (2) To require mediation, the specified public agency shall submit a written request for mediation to the local political subdivision or private entity.
- (3) The specified public agency may submit a request for mediation under this section at any time, but no later than 30 days after the day on which an impact fee is paid.
- (4) Upon the submission of a request for mediation under this section, the local political subdivision or private entity shall:
 - (a) cooperate with the specified public agency to select a mediator; and
 - (b) participate in the mediation process.

Enacted by Chapter 47, 2011 General Session

11-36a-705 Arbitration.

- (1) A person or entity intending to challenge an impact fee under Section 11-36a-703 shall file a written request for arbitration with the local political subdivision within the time limitation described in Section 11-36a-702 for the applicable type of challenge.
- (2) If a person or an entity files a written request for arbitration under Subsection (1), an arbitrator or arbitration panel shall be selected as follows:
 - (a) the local political subdivision and the person or entity filing the request may agree on a single arbitrator within 10 days after the day on which the request for arbitration is filed; or
 - (b) if a single arbitrator is not agreed to in accordance with Subsection (2)(a), an arbitration panel shall be created with the following members:
 - (i) each party shall select an arbitrator within 20 days after the date the request is filed; and
 - (ii) the arbitrators selected under Subsection (2)(b)(i) shall select a third arbitrator.
- (3) The arbitration panel shall hold a hearing on the challenge no later than 30 days after the day on which:
 - (a) the single arbitrator is agreed on under Subsection (2)(a); or
 - (b) the two arbitrators are selected under Subsection (2)(b)(i).
- (4) The arbitrator or arbitration panel shall issue a decision in writing no later than 10 days after the day on which the hearing described in Subsection (3) is completed.
- (5) Except as provided in this section, each arbitration shall be governed by Title 78B, Chapter 11, Utah Uniform Arbitration Act.
- (6) The parties may agree to:

- (a) binding arbitration;
- (b) formal, nonbinding arbitration; or
- (c) informal, nonbinding arbitration.
- (7) If the parties agree in writing to binding arbitration:
 - (a) the arbitration shall be binding;
 - (b) the decision of the arbitration panel shall be final;
 - (c) neither party may appeal the decision of the arbitration panel; and
 - (d) notwithstanding Subsection (10), the person or entity challenging the impact fee may not also challenge the impact fee under Subsection 11-36a-701(1) or Subsection 11-36a-703(2)(a) or (2)(c).

(8)

- (a) Except as provided in Subsection (8)(b), if the parties agree to formal, nonbinding arbitration, the arbitration shall be governed by the provisions of Title 63G, Chapter 4, Administrative Procedures Act.
- (b) For purposes of applying Title 63G, Chapter 4, Administrative Procedures Act, to a formal, nonbinding arbitration under this section, notwithstanding Section 63G-4-502, "agency" means a local political subdivision.

(9)

- (a) An appeal from a decision in an informal, nonbinding arbitration may be filed with the district court in which the local political subdivision is located.
- (b) An appeal under Subsection (9)(a) shall be filed within 30 days after the day on which the arbitration panel issues a decision under Subsection (4).
- (c) The district court shall consider de novo each appeal filed under this Subsection (9).
- (d) Notwithstanding Subsection (10), a person or entity that files an appeal under this Subsection (9) may not also challenge the impact fee under Subsection 11-36a-701(1) or Subsection 11-36a-703(2)(a) or (2)(c).

(10)

- (a) Except as provided in Subsections (7)(d) and (9)(d), this section may not be construed to prohibit a person or entity from challenging an impact fee as provided in Subsection 11-36a-701(1) or Subsection 11-36a-703(2)(a) or (2)(c).
- (b) The filing of a written request for arbitration within the required time in accordance with Subsection (1) tolls all time limitations under Section 11-36a-702 until the day on which the arbitration panel issues a decision.
- (11) The person or entity filing a request for arbitration and the local political subdivision shall equally share all costs of an arbitration proceeding under this section.

Enacted by Chapter 47, 2011 General Session

APPENDIX D - HISTORIC COSTS

The following tables show a summary of projects with known historical costs.

The Santaquin City sanitary sewer system was installed in 1994 when the City installed miles of sewer pipe. The project was funded 47% from grants and the other 53% was paid in cash or bonded for by the City. Tables D-1 through D-4 show how costs per foot for different pipe diameters were calculated for various projects the City paid for. These costs were used in Table C-1 and C-2.

Table D-1: Historic Cost Paid by Santaquin for Original Sanitary Sewer System Project

Original System Historical Project Cost ¹	\$ 6,751,908
Impact Fee Eligible Cost ²	\$ 3,681,927

¹Cost includes Center Street Lift Station and 52 MG Winter Storage Ponds

²Recorded costs paid for by City

Total	\$ 78,250

APPENDIX E - IMPACT FEE FACILITIES PLAN CERTIFICATION

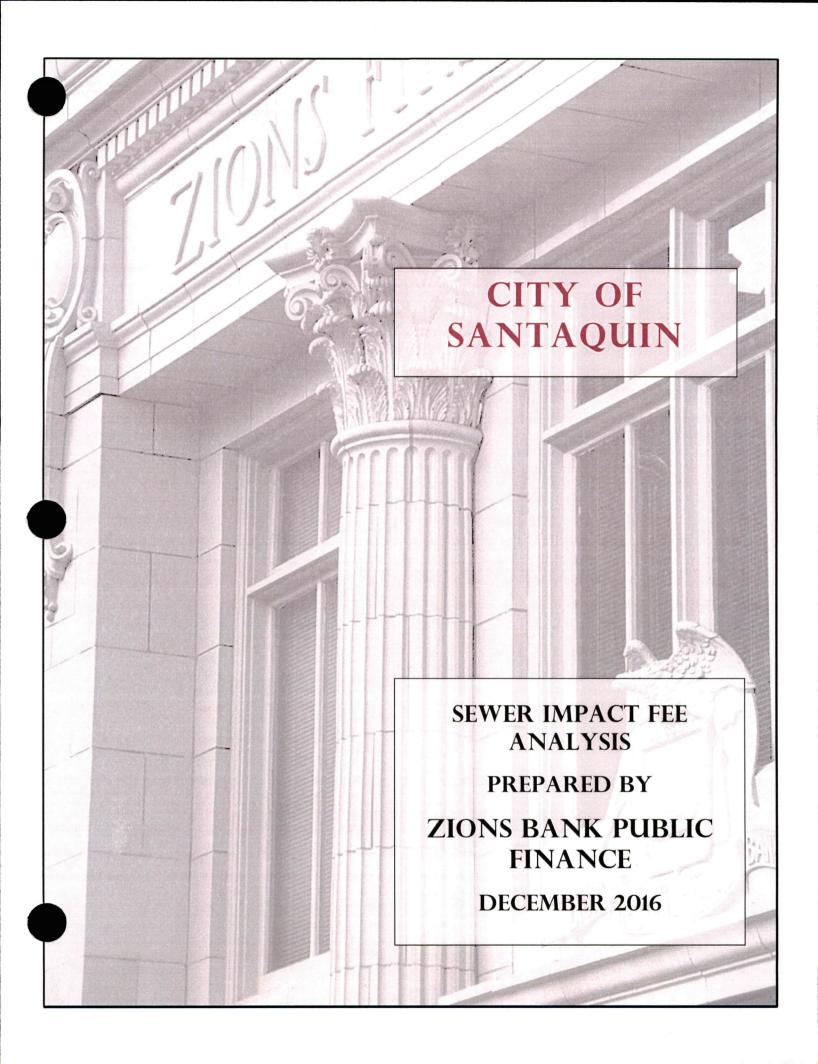

As required by Section 11-36a-306 of the Impact Fee Act, J-U-B Engineers, Inc. provides the following statement:

I certify that the attached Impact Fee Facilities plan:

- 1. includes only the costs of public facilities that are:
 - a. allowed in the Impact Fees Act; and
 - b. actually incurred; or
 - c. projected to be incurred or encumbered within 6 years after the day on which each impact fee is paid;
- 2. does not include:
 - a. costs of operation and maintenance of public facilities;
 - b. costs for qualifying public facilities that will raise the level of service for the facilities, through impact fees, above the level of service that is supported by existing residents;
 - c. an expense for overhead, unless the expense is calculated pursuant to the methodology that is consistent with generally accepted cost accounting practices and the methodological standards set forth by the federal Office of Management and Budget for federal grant reimbursements; and
- 3. complies with each and every relevant respect with the Impact Fees Act.

J-U-B Engineers, Inc.

Annendices: Certification Service Area Man Impact Fee Calculations	13

EXECUTIVE SUMMARY

Santaquin City, Utah (the City) recently commissioned Zions Public Finance, Inc. (Zions) to calculate the City's sewer impact fees in accordance with Utah State Law. An impact fee is a one-time charge to new development to reimburse the City for the cost of developing new sewer system capacity that will allow development to occur. In conjunction with this project, J-U-B Engineers (J-U-B) prepared the <u>Santaquin City Sanitary Sewer System Impact Fee Facilities Plan</u> (IFFP) dated November 2016.

City Sewer System and Service Area

The City owns and operates a wastewater treatment system that serves all connections within the current City boundaries and some residents in unincorporated areas. A major portion of the City's original sewer system and the recent water reclamation facility (WRF) were funded with grants and low interest loans. A City's service area map is included in Appendix A and shows where impact fees will be assessed by the City. This impact fee includes the cost of capacity in the existing water reclamation facility, collection system and lift station, wastewater effluent storage, and the sewer portion of the public works building.

The City's sanitary sewer system currently serves 3,199 Equivalent Residential Units (ERUs) as of 2016 and will add 2,039 more ERUS by 2026 which is the ten-year horizon. The level of service or demand per ERU is 200 gallons per average day.

Sewer System Costs and Allocations

The City's existing wastewater facilities have been constructed with a combination of City funding and grant funding. Also several bonds were issued to fund the original collection and lift station as well as the WRF. The total cost of the system is shown in the City's depreciation statements to be \$29,291,488 and \$12,765,982 was funded with grants. The grant funded portion of facilities have been removed from the impact fee.

The City will need to build \$10,729,418 (FV) of future sewer projects in the next ten years to expand the existing system capacities to accommodate new growth. These projects are required to provide capacity to allow new growth to connect to a safe and reliable system and are 100% allocated to growth. Additional bonds will need to be issued to fund these future improvements. The City prefers not to issue bonds but currently future bonds are necessary to fund the future capital projects due to cash and financial constraints in the sewer fund.

Recommended Sewer Impact Fees

The recommended impact fee structure presented in this analysis has been prepared to satisfy the Impact Fees Act, Utah Code Ann. § 11-36-101 et. seq., and represents the maximum sanitary sewer impact fees that the City may assess within the service areas. The City will be required to use other revenue sources to fund any projects identified in the IFFP that constitute repair and replacement, cure any existing deficiencies, increase the level of service or maintain the level of service for existing users.

The following table shows the maximum legal sanitary sewer impact fee that the City can assess per ERU. The final impact fee paid will be based on the unique characteristics of the residential or non-residential property that is proposed to be developed. All multi-family and non-residential units will be assessed an impact fee according to the number of fixture units as determined by the International Residential Code (IRC) from 2015.

FIGURE ES.1: IMPACT FEE PER SEWER ERU 1

Unit Type	ERU Equivalent	Pric	e per ERU	P	roposed Fee
Single Family Residential	1.00	\$	4,416	\$	4,416
Multi-Family/ Non-Residential (16 Fixture Units)*	1		4,416		4,416

^{*} Fixture units are based upon the 2015 IRC

Figure ES.2 provides a calculation of the impact fee for a non-standard user that may not fit the schedule found in the previous table. The non-standard calculation is based on the estimated gallons of use of a new property on a peak month average day basis and the proposed cost per gallon of wastewater for each of the service areas. It is at the City's discretion if the non-standard calculation will be used and clear and thorough documentation of the proposed property's estimated demand must be provided.

FIGURE ES. 2: CALCULATION OF NON-STANDARD SEWER IMPACT FEE

Non-Standard Users Impact Fee Formula

Step 1: Identify Estimated Average Day Gallons per Day Divided by 200 for an ERU Count Step 2: Multiply ERUs Calculated in Step 1 by \$4,415 per ERUs

¹ The proposed impact fee shown above includes the cost of a surface water storage pond included at the cost of \$3,797,086 (FV) which is likely to be the proposed solution for effluent storage. However, the City may be able to develop a ground water storage system in the future at a cost of \$961,212 but it is not yet known if the less expensive alternative can be implemented. The difference in the impact fees given the different storage alternatives is \$690. Until a final storage solution is determined, the City will set aside \$690 that relates to the higher project cost in a special fund that will be reimbursed back to impact fee payers in case the less expensive ground water recharge option is implemented.

CHAPTER 1: OVERVIEW OF THE CITY SEWER IMPACT FEES

Impact Fee Overview

An impact fee is a one-time fee, not a tax, charged to new development to recover the City's cost of constructing sewer facilities with excess capacity that will be utilized by new growth. The fee is assessed at the time of building permit issuance as a condition of development approval. The calculation of the impact fee must strictly follow the Impact Fees Act to ensure that the fee is equitable, fair, and legally defensible. This analysis provides documentation that there is a fair comparison, or rational nexus, between the impact fee charged to new development and the impact on the capacity of the system.

Until new development utilizes the full capacity of existing facilities the City can assess an impact fee to recover its cost of latent capacity available to serve future development. The general impact fee methodology divides the available capacity of existing and future capital projects between the number of existing and future users.

Qualifying and Non-Qualifying Costs

The impact fees proposed in this analysis are calculated based upon:

- New capital infrastructure for sewer treatment;
- Professional and planning expenses related to the construction of new infrastructure; and
- Any impact fee qualifying historic costs of existing improvements that will serve new development.

The costs that cannot be included in the impact fee are as follows:

- Projects that cure existing deficiencies for existing users;
- Projects that increase the level of service above that which is currently provided;
- Operations and maintenance costs;
- · Costs of facilities funded by grants or other funds that the City does not have to repay; and
- Costs of reconstruction of facilities that do not have capacity to serve new growth.

Level of Service, ERU Definition

The level of service standard is established in the IFFP and reflects City policies, sound engineering analysis and standards, and observed demands. This is a defensible level of service that is established in the IFFP and it is anticipated that this level of service per ERU will be perpetuated into the future. However, the City has the right to increase this established level of service in the future by constructing facilities that will provide

greater capacity but such level of service increases cannot be funded through impact fees. The City will have to find other funding sources, such as user rates, for projects that increase level of service should it decide to do so. There are currently no plans to increase the level of service beyond what is proposed in the IFFP.

Description of the Service Area

The sewer impact fee service area includes all areas in the City boundaries and various unincorporated customers. The City does have a collection system. A map of the City's service area where impact fees will be assessed is found in Appendix A.

CHAPTER 2: IMPACT FROM GROWTH UPON THE CITY'S FACILITIES AND LEVEL OF SERVICE

Future Sewer Demand within the Service Area

Sewer demand within the City will increase as development activity continues and homes and other types of development are built. Currently there are 3,199 ERUs and there will be 16,289 total ERUs when buildout is estimated to occur at buildout at some point in the future. This study focuses on a ten-year horizon from 2016 to 2026 when the system will add 2,039 sewer ERUs of growth. Figure 2.1 shows the growth in ERUs through an estimated buildout and Figure 2.2 shows the increase in ERUs expected from 2016 to 2026.

FIGURE 2.1: PROJECTED GROWTH IN DEMAND (ERUS)

Year	Population	ERUs	Ave Day Demand (GPD)	GPD per ERU

Sewer Level of Service

Figure 2.3 shows the general sewer design characteristics for the programmed level of service for hydraulic and biological demands and hydraulic flow through the City's collection system.

FIGURE 2.3: ENGINEERING LEVEL OF SERVICE FOR FACILITY DESIGN

10 10 10 10 10 10 10 10 10 10 10 10 10 1	Treatment L	evel of Se	rvice
BOD	25mg/l	DO	5 mg/l min
TSS	25 mg/l	TRC	1.8 mg/l max
E Coli	126 / 158 CFU	TIN	10 mg/l
рН	6.5-9.0		

Impact Fee Equivalent Residential Unit

The City's sewer infrastructure is sized to be adequate to meet peak month average day demand. The primary measurement used for sewer treatment demand and improvement sizing and capacity evaluations in this analysis is an ERU which is equal to 200 gallons per average day in the peak month. The City's treatment infrastructure is sized to be adequate to meet peak month average day demand. The primary measurement used for sewer treatment demand and improvement sizing and capacity evaluations in this analysis is an ERU which is equal to 200 gallons per average day in the peak month.

A fair impact fee is calculated by dividing the cost of existing and future facilities by unused capacity in existing or future facilities expressed in terms of an ERU. This cost per ERU is then multiplied by the estimated demand of an individual home, business, or other non-residential user expressed in term of an ERU or 200 gallons on an average day in the peak month to determine the final impact fee to be paid.

CHAPTER 3: HISTORIC AND FUTURE CAPITAL PROJECTS COSTS

The Impact Fees Act allows for the inclusion of various growth-driven capital cost components improvements and appropriate professional services inflated from current dollars to construction year costs. Impact fees can only fund system improvements which are defined as facilities or lines that contribute to the entire system's capacity rather than just to a small, localized area. The City has currently several outstanding bonds related to sewer capital projects and the City does not anticipate issuing debt in future years. The City may receive future grants to fund future projects but none are considered in this analysis. If future grants are received then an amendment to the IFA may be required.

Historic Capital Project Costs

This analysis considers existing assets in the calculation of the impact fees per ERU. This is referred to as the buy-in which represents the cost of infrastructure that has been built in the past that still has capacity in it available for new growth. Only historic costs can be used in calculating the buy-in however any grants used to fund improvements must be excluded.

Existing Collection and Lift Station Facilities

The existing collection and lift station facilities cost about \$10,505,814 to construct. The majority of that cost is related to the original system dating back to about 1995 but more improvements have been added since then. Of this amount, it has been estimated that 46% (\$4,789,598) of the existing collection system costs are related to project improvements which are sewer lines constructed and installed by developers. These project improvements are not included in the impact fee. The remaining \$5,716,216 relates to system improvements of which \$3,979,938 was grant funded leaving \$1,736,278 as impact fee qualifying. Approximately 12.37% of the existing collection lines will be required to serve the ten-year demand. Additional interest cost from the 1993 and 2012 series of bonds related to the existing collection system is \$751,444 in total. The ten-year demand portion for the bond interest cost is also 12.37% which totals \$88,852. This represents \$426,119 in total future and existing impact fee costs to the ten-year demand.

Existing Water Reclamation Facility

The existing WRF cost the City \$16,660,688 to construct in about 2011. The WRF is entirely related to system improvements and there are no project improvements provided by the WRF. The City received \$8,768,044 in grant funding leaving \$7,874,643 as impact fee qualifying. Approximately 13.25% of the existing WRF is needed to serve the ten-year demand. This represents \$1,426,110 in impact fee costs for the portion of the existing WRF that will serve the ten-year demand. Three Series 2011 bonds were issued to help fund the WRF and 13.25% of these bonds' interest cost are assigned to the impact fees.

ZP

F I

Existing Sewer Storage Ponds

The City currently maintains a large and small storage pond required to hold effluent produced by the WRF. The small pond has a capacity of 52 MG and the large pond has a capacity of 126 MG. The small pond was constructed first and its capacity is entirely used. The large pond is mostly used and will not have sufficient capacity to serve the entire ten-year demand. The large pond was constructed for \$1,247,683 without the use of grants or bonds. Approximately 41.47% of the large storage pond is needed to serve the ten-year demand. This represents \$517,369 in impact fee costs to the ten-year demand. There is no existing debt related to the small pond.

Existing Sewer Building

The City has recently constructed a new public works building of which 25% is allocated to sewer facilities. Without this facility, the sewer system cannot be effectively operated. This facility is a new building and benefits existing as well as future users. Existing users will pay for this facility through user rates which will also be paid by new users. An impact fee credit is calculated based on the portion of the debt service that new users will pay through rates for the existing users' portion of the facility. The building was constructed for \$2,500,000 without grants but Series 2016 Excise Tax Revenue Bonds were issued. Approximately 15.57% of the sewer building is needed to serve the ten-year demand. The building adds \$637,500 to total sewer costs and \$99,284 for ten-year demand impact fee costs. A credit is calculated to be \$45.26 per ERU for the portion of the costs of the building that will relate to existing users.

Future Capital Projects

Future Collection and Lift Station

The City has more additions to the existing collection system to provide adequate capacity to meet the tenyear demand. The future collection projects total \$2,162,182 for the next ten years and 6.73% or \$145,555 of those projects' capacity will be used to serve the ten-year demand. Future bonds will be issued to fund these projects. It is assumed that the bonds will be 20 year bonds, have a 5% coupon, and 2% costs of issuance. These bonding assumptions are used for all future capital projects.

Future Water Reclamation Facility

The City has more additions to the WRF to provide adequate capacity to meet the ten-year demand. The future WRF project totals \$4,701,027 for the next ten years and 59.39% or \$2,791,705 of those projects' capacity will be used to serve the ten-year demand. Bonds will be used to fund these projects.

Future Sewer Storage Facilities

The City has more additions to the WRF storage ponds to provide adequate capacity to meet the ten-year demand. The future storage pond will cost a total of \$3,797,086 for the next ten years and 30% or \$1,139,126 of the storage project's capacity will be used to serve the ten-year demand. Bonds will be used to fund these projects.

The following future capital projects are necessary to meet demand in the sewer system for existing and future users. All construction estimates are shown in 2016 dollars and a 3.0% inflation rate is added to projects to be constructed after 2016. As shown in Figure 3.2 project costs were sorted by 10-year impact fee qualifying demand, beyond 10-year demand, or whether any portion is non-qualifying which includes portions of the project that will be utilized by existing users.

FIGURE 3.2: FUTURE CAPITAL PROJECT COSTS

By Component	10 Year Impact Fee Qualifying Cost	Impact Fee Qualifying Beyond 10 Years	Non Impact Fee Qualifying	Total Ten Year Construction Cost
Collection and Lift Station	\$ 145,555	\$ 2,016,626	\$ -	\$ 2,162,182
Water Reclamation Facility	2,791,705	1,909,321	-	4,701,027
Storage	1,139,126	3,113,611	-	3,797,086
Sewer Building	-	-	-	-
Total	\$ 4,076,386	\$ 7,039,558	\$ -	\$ 10,660,295

Bond Expenses

Outstanding Bonds

The City has nine different bonds outstanding related to sewer expenses. Two are no interest loans and have no real relevance to the impact fee study since they do not have interest costs associated with them. The bonds were either used to construct the original collection system, build the WRF, or construct the sewer portion of the new public work building.

FIGURE 3.3: OUTSTANDING BOND EXPENSE

Bond Issue	Total Par Amount			Interest		Fotal Debt Service
Series 1993A Sewer DWQ Loan (No Interest)	\$	1,000,000	\$	-	\$	1,000,000
Series 1993B Sewer DWQ Loan (No Interest)		1,307,000		-		1,307,000
Series 1993C Sewer USDA Loan		188,560	=	393,329		581,889
Series 1993D Sewer USDA Loan		123,474	1	257,123		380,597
Series 2012 Sewer Revenue Refund (Refunded 1993 C&D)		670,000		100,993	100	770,993
Series 2011 A-1 DWQ		6,034,000		570,635		6,604,635
Series 2011 A-2 USDA Loan		2,912,000		2,143,902		5,055,902
Series 2011B Sewer Revenue Bond DWQ		900,000	*	172,290		1,072,290
Series 2015 Lease Revenue Bonds (25% to Sewer)		2,500,000		1,236,905		3,736,905
Totals	\$	15,635,034	\$	4,875,178	\$	20,510,212

Figure 3.4 shows that the Series 1993 bonds, including the Series 2012 bond which refunded a 1993 bond, are all related to the original collection system. The 2011 bonds funded the WRF and the 2015 bond funded the public works building.

Future Bonds

The City anticipates the need to issue additional bonds in the future to fund the future costs of projects needed to serve new development. As mentioned above, the future bonds are structured to have a 20-year term, 2%

costs of issuance, and a 5% coupon. The interest related to future bonds is a reasonable expense for future impact fee payers to fund as the growth-related projects cannot be constructed without future financing.

FIGURE 3.5: FUTURE BOND FUNDING

Professional Expenses

質制

As development occurs and capital project planning is periodically revised, the future lists of capital projects and their costs may be different than the information utilized in this analysis. For this reason, it is assumed that the City will perform updates to the analysis every three years. The cost of preparing this analysis, the impact fee facilities plan and the future costs of updating both documents for a ten-year period of time has been included in the impact fee calculations at an estimated cost of \$78,250.

CHAPTER 4: PROPORTIONATE SHARE ANALYSIS

The Impact Fees Act requires the impact fee analysis to estimate the proportionate share of the cost for existing capacity that will be recouped. The impact fee must be based on the historic costs and reasonable future costs of the system. This chapter will show in Figure 4.1 and 4.2 that the proposed impact fee for system improvements by service area are reasonably related to the impact on the sewer system from new development activity.

The proportionate share analysis considers the manner of funding utilized for existing public facilities. Historically the City has funded existing infrastructure with sources including the following:

- Sewer Impact Fees
- Sewer User Rates and Miscellaneous Fees
- Special Assessment Bonds
- Revenue Bonds
- Developer Exactions

In the future, the City will rely upon sewer impact fees and possibly developer exactions to fund the capital projects required for future expansion of the system. Some rate revenues may be used to pay the debt service of any bonds or cash-funded projects in years when impact fee revenues are insufficient to cover the annual payment to principal and interest. However, if rate revenues are used to pay what should be funded through impact fees (due to a shortfall in impact fee revenues) then the general fund will be repaid with impact fees.

Grant funding is not secured at the moment, however, if any grants are received, future impact fees will be discounted according to the size of grant and what impact fee qualifying projects it will be intended to fund.

Developer Credits

If a project included in the Impact Fee Facilities Plan (or a project that will offset the demand for a system improvement that is listed in the IFFP) is constructed by a developer then that developer is entitled to a credit against impact fees owed. (Utah Impact Fees Act, 11-36a-304(2)(f)). There are currently no situations/projects in this analysis that would entitle a developer to a credit.

User Rate Credits

Credits to the impact fees have been calculated for any projects which will benefit existing users and be paid for through user rate funds. Credits have been calculated for treatment projects listed in the IFFP that will provide capacity to existing users.

Time-Price Differential

Utah Code 11-36a-301(2)(h) allows for the inclusion of a time-price differential in order to create fairness for amounts paid at different times. To address the time-price differential, this analysis includes an inflationary component to account for construction inflation for future projects. Projects constructed after the year 2016 will be calculated at a future value with a 3.0% inflation rate. All users who pay an impact fee today or within the next ten years will benefit from projects to be constructed and included in the fee.

Non-Standard Demand Adjustments

The City reserves the right under the Impact Fees Act (Utah Code 11-36-402(1)(c,d)) to assess an adjusted fee to respond to unusual circumstances and to ensure that the impact fees are assessed fairly. The impact fee ordinance must include a provision that permits adjustment of the fee for a particular development based upon studies and data submitted by the developer that indicate a more realistic and accurate impact upon the City's infrastructure. The impact fee formula shown below in Figure 4.4 for a non-standard user is based upon the anticipated annual sewer demand of that particular user.

Maximum Legal Sewer Impact Fees Based per ERU

As shown in Figure 4.1 and Figure 4.2, the maximum legal impact fee per ERU is calculated to be \$4,416². This fee is the combination of individual fees for treatment and professional fees. Each fee for individual components is based upon the historic and future costs divided by the total and available capacities. The result is a precise impact fee per ERU demand that complies with the Impact Fees Act.

<u>Determination of Residential and Non-Residential Impact Fees</u>

The impact fees to be paid by different residential and non-residential users are assessed according to demand per ERU. Demand in terms of ERUs will be assessed individually by the City's engineers who will determine the number of ERUs per new development. The impact fee per ERU will then be multiplied by that figure. All multi-family and non-residential units will be assessed an impact fee according to the number of fixture units as determined by the International Residential Code (IRC) from 2015.

² The proposed impact fee shown above includes the cost of a surface water storage pond included at the cost of \$3,797,086 (FV) which is likely to be the proposed solution for effluent storage. However, the City may be able to develop a ground water storage system in the future at a cost of \$961,212 but it is not yet known if the less expensive alternative can be implemented. The difference in the impact fees given the different storage alternatives is \$690. Until a final storage solution is determined, the City will set aside \$690 that relates to the higher project cost in a special fund that will be reimbursed back to impact fee payers in case the less expensive ground water recharge option is implemented.

APPENDICES: CERTIFICATION, SERVICE AREA MAP, IMPACT FEE CALCULATIONS

In accordance with Utah Code Annotated, 11-36a-306(2), Zions Public Finance, Inc., makes the following certification:

Zions Public Finance, Inc. certifies that the attached impact fee analysis:

- 1. includes only the cost of public facilities that are:
 - a. allowed under the Impact Fees Act; and
 - b. actually incurred; or
 - c. projected to be incurred or encumbered within six years after the day on which each impact fee is paid;
- 2. does not include:
 - a. costs of operation and maintenance of public facilities;
- b. cost of qualifying public facilities that will raise the level of service for the facilities, through impact fees, above the level of service that is supported by existing residents;
- c. an expense for overhead, unless the expense is calculated pursuant to a methodology that is consistent with generally accepted cost accounting practices and the methodological standards set forth by the federal Office of Management and Budget for federal grant reimbursement;
- 3. offset costs with grants or other alternate sources of payment; and
- 4. complies in each and every relevant respect with the Impact Fees Act.

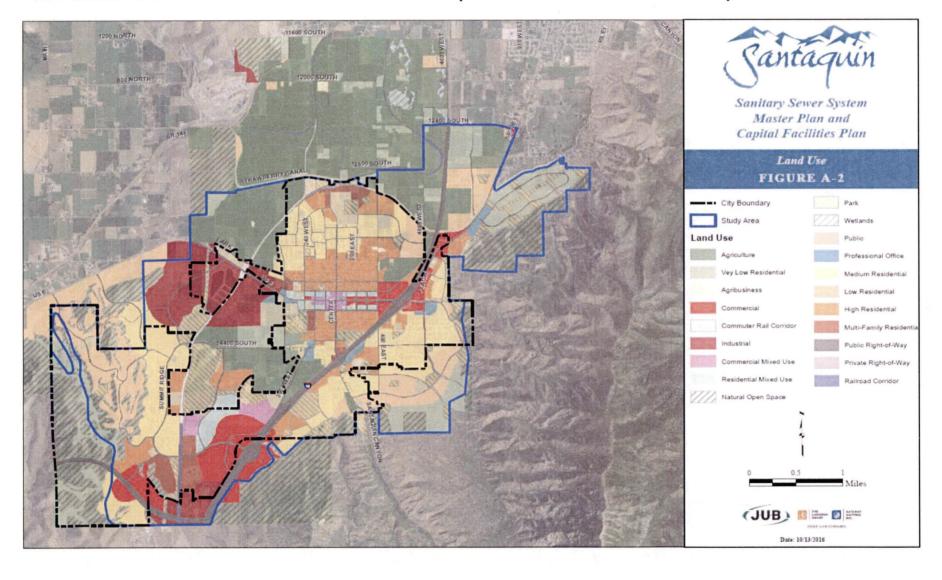

Zions Public Finance, Inc. makes this certification with the following caveats:

- 1. All of the recommendations for implementations of the Impact Fee Facilities Plan (IFFP) made in the IFFP or in the impact fee analysis are followed in their entirety by City staff and City Council in accordance to the specific policies established for the Service Area.
- 2. If all or a portion of the IFFP or impact fee analysis are modified or amended, this certification is no longer valid.
- 3. All information provided to Zions Public Finance, Inc., its contractors or suppliers is assumed to be correct, complete and accurate. This includes information provided by Santaquin City and outside sources. Copies of letters requesting data are included as appendices to the IFFP and the impact fee analysis.

Dated: 12/21/2016
